

# **Towson TEK**

A solution for Housing  
Management

Our main objective is creating a powerful  
yet simple Database to use and follow  
through

## **Advantages**

Provides efficient access to data  
Clean and consistent as well as easy to understand  
Can represent the real world structure of the problem  
Data Integrity is strong and accurate

## **Functions**

Multiple users having access to the same database  
Data Redundancy will be little to none which reduces the  
size of database  
Data independence which separates the data and the  
application so updating database will not crash the app

## **Limitations**

No password requirement to enter the database  
Maintenance will be required to continue to update the  
database which changes structure slightly
